

Potluck Files
Workshop

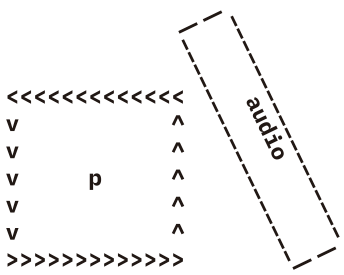

What is HTML?

If a webpage is a room:
>HTML is the structure (what is inside).
>CSS is the decor and style.
>JavaScript is the action and motion.

HTML focuses on content and relationships rather than appearance. It is the most basic and easy-to-understand web language—if you can write text, you already know the basics of HTML.

Introduction

This is a handbook for the Potluck Files workshop as a practice-based publication.

What are Potluck Files?

‘Potluck’ comes from ‘luck of the pot,’ and usually refers to a gathering where each participant brings a dish to share, forming a diverse and unpredictable table of food. It is a practice centered on sharing, chance, and social interaction.
In the workshop, we translate this concept into the form of ‘files’—each participant brings a file they wish to share (JPG, MP3, PDF, etc.).

What is the Potluck Files workshop?

Potluck Files is a practice of sharing that is generated offline and continues to flow online.
In the workshop, we will:

·Share how to turn files into webpages

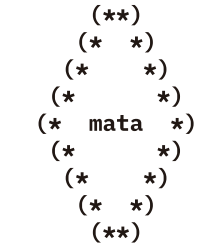

·Introduce basic web-building like HTML and CSS

·Encourage ongoing sharing and re-creation

Who are we?

Kiki and Sibyl, students from the Experimental Publishing Master’ s program at Piet Zwart Institute in Rotterdam, the Netherlands.

This workshop is part of our project Special Issue 29 – Gossiping at the Intersection of Crafts and Resistances.

MacBook **Linux** **Windows**

1. Create a folder
Please use English for the folder name

2. Add the files you want to share
File types and content are unrestricted (images, audio, PDF, text, etc.).
The total folder size must not exceed 1GB.

3.Open the terminal
Search for Terminal in the search bar.

4.Navigate to your folder in the terminal
Type: **cd + [space]**
Then drag your folder into the terminal window and press Enter.

5. Create an HTML file
Type: **nano index.html**
or
notepad index.html

6. Press Enter,
then enter the following HTML content and save it

```
<!doctype html>

<html>

<head>
<meta charset="UTF-8">
</head>

<style>
body{background-color: rgb(255, 255, 255); /* editable */
color: rgb(0, 0, 0); /* editable */
font-family: "IBM Plex Mono", monospace;  /* non-editable */ padding: 20px; /* editable */
</style>

<body>
<p style="color: rgb(0, 0, 0); /* editable */">text</p>

<!-- Embed photo file -->
<img src="xxx.JPG"
style="width:66%;
height:auto;
display:block;
margin: 20px auto;">
</img>

<!-- Embed audio file -->
<audio controls
style="width:66%;
display:block;
margin: 20px auto;">
<source src="xxx.mp3"
type="audio/mpeg">
</audio>

<!-- Embed pdf file -->
<iframe src="link or file's name"
style="width:66%;
height:600px;
border:1px solid #ccc;
background-color: white;
display:block;
margin: 20px auto;">
</iframe>

</body>

</html>
```
